### GEAR SHIFT ADVISOR

Provides up/down indication of the gear shift to ensure optimal operation of the vehicle.

### ENGINE BRAKE

When the engine brake is on, the constant throttle valve and the butterfly valve work in tandem to save fuel, reduce brake wear and make driving in downhill operations safer.

### THICKER AND DURABLE FRAME

In frame, 9mm thick frame and high strength BSK46 steel ensures higher durability and reliability.

### 3 PIECE BUMPER

In the event of collision, only the damaged part has to be replaced. Thus reducing the maintenance cost.

### TURBOCHARGER

High boost turbocharger ensures the perfect blend of air and fuel mixture, thus reducing fuel consumption.

### ANTI-ROLL BAR (Front-Std; Rear-Optional)

The anti-roll bar increases vehicle stability on application with high centre of gravity. This improves driving confidence and safety especially during cornering at high speeds.

### POWER REDUCTION (PR) COMPRESSOR

The new optimized compressor operates based on the engine duty cycle to ensure better fuel efficiency.

### ENGINE OVERRUN BUZZER

The inbuilt buzzer system detects engine overspeeding resulting from sudden downshifting of gears (lower than the recommended shift) and provides an acoustic alarm to alert the driver. This helps prevent engine damage.

### LONG LASTING CABIN PAINT

With 800 hours of UV testing done for better cabin paint reliability.

### DIFFERENTIAL LOCK

Avoids the wheel spinning on slushy roads, enabling faster trip turnaround time.
